SUMMARY

Generative AI Engineer and Full-Stack Developer with hands-on experience building agentic AI systems, MCP workflows, and production-grade web applications. Proficient in Python, TypeScript, and the MERN stack with a strong focus on LLM integration, intelligent automation, and end-to-end software delivery.

EXPERIENCE

AI/ML Engineer Intern — SoftechInc.ai

Jul 2025 – Oct 2025

- Built an intelligent chatbot for DigiDine restaurant platform, automating customer query resolution.
- Deployed predictive ML models improving order forecasting accuracy in a remote-first team.
- Collaborated with cross-functional teams to integrate AI modules into client-facing full-stack web applications.

Teaching Assistant, Computer Science — Quaid-i-Azam University

Sep 2025 – Jun 2026

- Guided students through lab sessions in programming fundamentals and AI, improving average lab scores.

PROJECTS

Jarvis — AI Voice Assistant *[ElevenLabs, AI Agents, Memory]*

Developed an AI voice assistant using ElevenLabs for natural speech synthesis, integrated memory from chat history for contextual conversations, and designed for executing tasks and future social app integration.

Bulao — Voice-First AI Home Services Platform *[Python, FastAPI, DigitalOcean GenAI]*

Built a 6-agent orchestration swarm at AI Seekho 2026 Hackathon automating provider discovery, ranking, pricing, booking, and post-service follow-up. Implemented deterministic offline fallback and containerized the architecture with Docker.

AI-OS — Unified AI Operating System *[FastAPI, Redis, Celery, Next.js, Docker, MCP, FastMCP, PostgreSQL, MongoDB]*

Open-source 8-microservice stack for agent routing and automated API key rotation with sub-10ms event routing. Built autonomous agentic AI workflows using MCP and FastMCP for automated data processing, with context-aware AI tools supporting stateful streaming (STDIO, StreamableHTTP). Integrated LLM pipelines with PostgreSQL and MongoDB for automated report generation. Built Prometheus/Grafana observability pipelines and a Claude Code Proxy with multi-model fallback.

AI-Powered CV Generator *[React 19, Node.js, MongoDB, MCP]*

Full-stack system automating CV generation via natural language commands through Claude Desktop, producing professional PDFs in 3 formats (Europass, Modern, Classic) using Python and ReportLab.

Agentic Static-to-Dynamic Website Converter (FYP) *[LangGraph, LangChain, MERN, Agentic AI]*

AI-driven pipeline that converts static websites into fully dynamic MERN applications using multi-agent orchestration with validation gates and automated retry loops.

EDUCATION

BS Computer Science — Quaid-i-Azam University, Islamabad

Sep 2022 – Jun 2026

- Relevant Coursework:** Artificial Intelligence, Machine Learning, Deep Learning, Data Structures, Database Systems, Software Engineering

SKILLS

- Languages:** Python, JavaScript, TypeScript, Java, C++, SQL
- AI/ML:** Generative AI, Agentic Systems, MCP, LangChain, LangGraph, FastMCP, Deep Learning, Machine Learning
- Web & Cloud:** React, Next.js, Node.js, Express, FastAPI, MongoDB, MySQL, Docker, Kubernetes, Redis, Git
- Core CS:** Data Structures, Algorithms, OOP, REST APIs, Software Engineering, CI/CD

CERTIFICATIONS

- Anthropic** — Introduction to MCP & Advanced MCP Topics
- Google** — AI Essentials Certification
- Coursera** — Python for Everybody Specialization & Data Structures in Python
- QBCS Media Coordinator** — Awarded Shield of Appreciation for organizing the Zindagi Prize Collaboration
